

作业 5

朱志儒 SA20225085

6.6 (a) FP-growth 算法:

L₁ 项集: {{K:5}, {O:4}, {E:4}, {M:3}, {Y:3}}

TID	排序后
T100	{K, O, E, M, Y}
T200	{K, O, E, Y}
T300	{K, E, M}
T400	{K, M, Y}
T500	{K, O, E}

构建 FP-tree:

Item	Cond. Pattern base
O	K:3
E	KO:3, K:1
M	KOE:1, KE:1, K:1
Y	KOEM:1, KOE:1, KM:1

Y 的条件 FP-tree:

频繁模式组合: {K, Y: 3}

M 的条件 FP-tree:

频繁模式组合: {K, M: 3}

E 的条件 FP-tree:

频繁模式组合: {{K, E: 4}, {O, E: 3}, {K, O, E: 3}}

O 的条件 FP-tree:

频繁模式组合: $\{K, O: 3\}$

(b) 由题可得:

$$\text{support}(K) = 5, \text{support}(O) = 4, \text{support}(E) = 4$$

$$\text{support}(K, O) = 3, \text{support}(K, E) = 4, \text{support}(O, E) = 3$$

$$\text{support}(K, O, E) = 3$$

$$\forall x \in \text{transaction}, \text{buys}(X, K) \wedge \text{buys}(X, O) \Rightarrow \text{buys}(X, E) \quad [60\%, 100\%]$$

$$\forall x \in \text{transaction}, \text{buys}(X, E) \wedge \text{buys}(X, O) \Rightarrow \text{buys}(X, K) \quad [60\%, 100\%]$$
